- 2) Material to affix your poster to the display boards will be provided to you, and will be on your display board when you arrive.
- 3) Limit the amount of printed material. Posters should not be elaborate, nor need they be expensive. If supplemental material is desired, you may hand out information sheets to those viewing your poster.
- 4) Each poster must have a top label indicating the title of the poster, the names of the authors and their affiliations. The size of the characters for the title should be at least 0.8" (2 cm) high.
- 5) Poster text should be large enough to be read from a distance of 3' (1 meter) or more. This is possible using a letter size of at least 0.4" (1 cm).
- 6) Keep illustrative material simple. Charts, drawings and illustrations are usually similar to those used in making slides. Simple use of colour is effective for adding emphasis.
- 7) Simple "Introduction" and "Conclusion" sections are usually helpful. When feasible, use graphs for demonstrating qualitative relationships, use tables for precise numerical values.
